Fact Sheet:
Tall Timbers -Brechtel Recovery Roads

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of $55,200,000. Completed repairs in the Tall Timbers—Brechtel neighborhood totaled approximately $64,000.

Phase II: The Tall Timbers—Brechtel Recovery Roads program will include multiple construction repair projects with a total estimated value that is approximately $1,100,000. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. Construction in Tall Timers—Brechtel is scheduled to begin in Q3 2016 and last through Q3 2017. Road resurfacing work will be limited in some areas of Tall Timers—Brechtel.

What to expect during construction:

Residents and businesses in Tall Timers—Brechtel should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The Tall Timers—Brechtel design team is Richard C. Lambert Consultants. The construction contract is scheduled to be available for bid in Q2 2016.
