Fact Sheet: Florida Development Recovery Roads Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of $55,200,000. The total cost of Phase I repairs completed in the Florida Area Development area totaled approximately $303,000.

Phase II: The Florida Area Development Recovery Roads program will include multiple construction repair projects with an estimated value for roadway improvements of $6,500,000. Design of the future road repairs is currently underway and is being coordinated with the Sewerage and Water Board of New Orleans. Florida Area Development construction is currently scheduled to begin in the 3rd Quarter of 2017 and last through the 3rd Quarter of 2018. Road resurfacing work will be limited in some areas of Florida Area Development.

What to expect during construction:

Residents and businesses in the Florida Area Development should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The Florida Area Development engineering and design firm is ABMB Engineers, Inc. The construction contract is scheduled to be available for bid in the 2nd Quarter of 2017.
