Fact Sheet: Gentilly Terrace Recovery Roads Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of $55,200,000. The total cost of Phase I repairs completed in the Gentilly Terrace area totaled approximately $1,300,000.

Phase II: The Gentilly Terrace Recovery Roads program will include multiple construction repair projects with a total estimated value for roadway improvements that is approximately $16,900,000. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. Gentilly Terrace construction is currently scheduled to begin in late fall 2015 and last through winter 2017. Road resurfacing work will be limited in some areas of Gentilly Terrace.

What to expect during construction:

Residents and businesses in Gentilly Terrace should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The Gentilly Terrace engineering and design firm is Phoenix Global Engineering and Construction. The construction contract is scheduled to be available for bid in summer 2015.
