Fact Sheet: Lake Terrace and Oaks Recovery Roads Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of $55.2 million. The total cost of Phase I repairs completed in the Lake Terrace and Lake Oaks area totaled approximately $714,000.

Phase II: The Lake Terrace and Lake Oaks Recovery Roads program will include multiple construction repair projects with an estimated value for roadway improvements is approximately $7,700,000. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. Lake Terrace and Lake Oaks construction is currently scheduled to begin in Q4 of 2016 and last through Q4 of 2017. Road resurfacing work will be limited in some areas of Lake Terrace and Lake Oaks.

What to expect during construction:

Residents and businesses in the Lake Terrace and Lake Oaks area should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The Lake Terrace and Lake Oaks engineering and design firm is Hatch Mott MacDonald. The construction contract is scheduled to be available for bid in Q3 of 2016.
