

# Fact Sheet: Broadmoor Recovery Roads Program

City of New Orleans  
Department of  
Public Works

## Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

## Project Facts:

**Phase I:** Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of \$55.2 M. The total cost of Phase I repairs completed in Broadmoor totaled approximately \$650,000.

**Phase II:** The Broadmoor Recovery Roads program will include multiple construction repair projects with a total estimated value of approximately \$4 million for roadway improvements. Design of the future road repairs is currently in design and is being closely coordinated with the Sewerage and Water Board of New Orleans. In Broadmoor, construction is currently scheduled to begin in Summer 2013 and last through Summer 2014. Road resurfacing work will be limited in some areas of Broadmoor.

## What to expect during construction:

Residents and businesses in Broadmoor should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. Digital Engineering and Imaging, Inc. will be designing road improvements in the Broadmoor area. The construction contracts is scheduled to be available for bid in Spring 2013.
