Fact Sheet: Marlyville-Fontainebleau Recovery Road Program Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of $55,200,000. The total cost of Phase I repairs completed in Marlyville-Fontainebleau totaled approximately $1,300,000.

Phase II: The Marlyville-Fontainebleau Recovery Roads program will include multiple construction repair projects with a total estimated value of approximately $13,000,000 for roadway and waterline improvements. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. In Marlyville-Fontainebleau, construction is currently scheduled to begin in fall 2019 and last through fall 2020. Road resurfacing work will be limited in some areas of Marlyville-Fontainebleau.

What to expect during construction:

Residents and businesses in the Marlyville-Fontainebleau area should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. Schrenk, Endom and Flanagan, LLC will be designing road improvements in the Marlyville-Fontainebleau area. The construction contract is scheduled to be available for bid in summer 2019.
