

Fact Sheet: East Carrollton Recovery Roads Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of \$55.2 M. The total cost of Phase I repairs completed in the East Carrollton and Black Pearl area totaled approximately \$250,000.

Phase II: The East Carrollton Recovery Roads program will include multiple construction repair projects with a total estimated value for roadway improvements that is approximately \$2,100,000. Design of the future road repairs is scheduled to begin in Summer 2013 and is being closely coordinated with the Sewerage and Water Board of New Orleans. East Carrollton construction is currently scheduled to begin in Summer 2014 and last through Late Winter 2015. Road resurfacing work will be limited in some areas of East Carrollton.

What to expect during construction:

Residents and businesses in East Carrollton should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The East Carrollton engineering and design firm is yet To Be Determined. The construction contract is scheduled to be available for bid in Spring 2014.
