Fact Sheet: Plum Orchard Recovery Roads Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of $55,200,000. The total cost of Phase I repairs completed in the Plum Orchard area totaled approximately $1,900,000.

Phase II: The Plum Orchard Recovery Roads program will include multiple construction repair projects with an estimated value for roadway and infrastructure improvements of approximately $8,000,000. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. Plum Orchard construction is currently scheduled to begin in Q3 2017 and last through Q3 2018. Road resurfacing work will be limited in some areas of Plum Orchard.

What to expect during construction:

Residents and businesses in the Plum Orchard area should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The Plum Orchard engineering and design firm is Pinnacle Engineering. The construction contract is scheduled to be available for bid in Q2 2017.
