Fact Sheet: West End Recovery Roads Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of $55,200,000. The total cost of Phase I repairs completed in the West End area totaled approximately $1,500,000.

Phase II: The West End Recovery Roads program will include multiple construction repair projects with an estimated value for roadway improvements of approximately $13.5 M. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. West End construction is scheduled to begin in Early 2015 and last through Early 2016. Road resurfacing work will be limited in some areas of West End.

What to expect during construction:

Residents and businesses in the West End area should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. The West End engineering and design firm is Atkins North America. The construction contract is scheduled to be available for bid in Winter 2014.
