Fact Sheet: St. Anthony Recovery Road Repairs

City of New Orleans
Department of
Public Works

Project Summary:

The City of New Orleans will implement a multi-million dollar, multi-year comprehensive infrastructure improvement program to repair Hurricane Katrina related sub-surface and road damages. Types of repairs deemed eligible for improvement by FEMA include utilities, sidewalks, American with Disabilities Act compliant ramps, driveway aprons, curbs and road paving.

Project Facts:

Phase I: Between 2008-2009, the City of New Orleans performed citywide repairs to approximately 17,000 damage sites at an estimated cost of $55,200,000. The total cost of Phase I repairs completed in the St. Anthony area totaled approximately $2,300,000.

Phase II: The St. Anthony Recovery Roads program will include multiple construction repair projects with a total estimated value of approximately $13,800,000 for roadway improvements. Design of the future road repairs is currently underway and is being closely coordinated with the Sewerage and Water Board of New Orleans. St. Anthony construction is currently scheduled to begin in fall 2014 and last through summer 2016. Road resurfacing work will be limited in some areas of St. Anthony. The Sewerage and Water Board of New Orleans will complete subsurface utility line improvements prior to the Department of Public Works' road repairs.

What to expect during construction:

Residents and businesses in the St. Anthony should exercise caution when driving, bicycling or walking near active construction sites. Residents can expect to experience temporary construction inconveniences such as limited access to areas within the construction zones, detours, movement of heavy equipment, safety signage and sounds.

In general, construction crews will be working from 7 a.m. to 5 p.m., Monday through Friday. ARCADIS and The Shaw Group will be designing road improvements in the St. Anthony area. Construction contracts are scheduled to be available for bid in summer 2014.
